Business Intelligence and IT Data Analyst with experience in data analysis, automation, and dashboard development. Skilled in query MySQL, MongoDB and Python, as well as data visualization tools including Google Sheet, Metabase and Apache Superset. Experienced in forecasting, CLV/CLTV, RFM analysis, and competitor analysis, with hands-on experience in building automated data pipelines and delivering insights in the mining industry, including unit maintenance, HSE, and asset monitoring to support data-driven decision-making

EDUCATION

Islamic University of Indonesia (UII) | Master of Statistics

Jan 2024 – Mar 2026

Interest: Business Analys

Islamic University of Indonesia (UII) | Bachelor of Statistics

Sep 2018 – Aug 2022

Interest: Data Science

EXPERIENCE

Foreman IT Data Analyst | STGRI Holding PT Sinar Terang Mandiri Tbk

Mar 2026 – Now

- Developed end-to-end data automation pipelines, transforming raw data into structured, data-driven systems integrated with MySQL databases
- Built and maintained automated reporting systems and dashboards using Metabase to support business monitoring and decision-making
- Performed data analysis in the mining industry, including:
 - Unit maintenance analysis to improve operational efficiency
 - HSE (Health, Safety, and Environment) analysis to support compliance and risk mitigation
- Monitoring and analysis of mining asset performance for operational optimization
- Collaborated with cross-functional teams to translate business requirements into data solutions and actionable insights
- Ensured data accuracy, consistency, and reliability across reporting systems and dashboards

Supervisor IT Data Analyst | PT Gawe Becik Nadhah Anugrah

Jan 2023 – Feb 2026

- Designed and developed data-driven systems, including user flow, database architecture, and reporting dashboards to support business operations
- Conducted end-to-end data analysis (forecasting, RFM clustering, CLV/CLTV, and competitor analysis) to drive strategic decisions in digital sales and marketplace expansion
- Built and deployed machine learning models for face recognition-based attendance systems using DeepFace and FaceNet
- Automated reporting pipelines using SQL, Python, Metabase, and Google Sheets to generate real-time insights (hourly, daily, weekly, monthly)
- Created and managed interactive dashboards using Metabase, Apache Superset and Google Sheets to monitor sales performance, campaign effectiveness, and customer behavior
- Optimized data querying and processing using SQL (MySQL) and NoSQL (MongoDB) for analytics and reporting efficiency
- Led and coordinated a development team in delivering multiple business applications (CRM, sales system, advertising platform, broadcasting system)

Digital Transformation | Singhasari (Kampus Merdeka)**Mar 2022 - Jul 2022**

- Acquire knowledge of programming languages including basic HTML Vue JS, Laravel, and AWS Cloud
- Designed and managed the database architecture using MySQL to support project requirements
- Developed data reporting and visualization dashboards using Looker Studio, ensuring insights were accessible to stakeholders
- Accountable for carrying out the assigned science data task and delivering the final project presentation in the form of the SEMARTOUR website

Data Science | Digital Talent Scholarship KOMINFO**Jun 2022 - Jul 2022**

- Analyzed and visualization covid-19 Indonesia using R Studio
 - Completed the project R fundamental for data science, fundamental SQL and statistics using R for data science
 - Learning R studio with a tutor to increase data science skills
-

ORGANIZATIONS**Chief of Indonesian Moslem Student Movement | FMIPA UII****Oct 2020 – Nov 2021**

- Controlled, executed and confirmed all organizational activities in Indonesian Moslem Students Movement faculty of the mathematics and sciences
- One great work plan about Masa Penerimaan Anggota Baru (MAPABA) with hybrid system

Chief of Social Society Department | Ikatan Keluarga Statistika (IKS) UII**Mei 2019 – Jun 2020**

- Manage all work plans social society Ikatan Keluarga Statistika (IKS) UII, and one great work plan about social service in panti Al-Hakim Yogyakarta

Chief of Assessment | Indonesian Moslem Student Movement FMIPA UII**Sep 2019 – Oct 2020**

- Manage all work plans, develop public speaking and skill debate members
 - Collaboration with engineering faculty for scientific paper discussion
-

RESEARCH**Sentiment Analysis of Omnibus Law Using Support Vector Machine (SVM) Method****Jul 2022**

- Using python software in data analysis
- Analysis by Support Vector Machine method
- As a final project major Statistics in Data Science

Sentiment Analysis of Vaccine Indonesia in 2021 using RStudio**Jul 2021**

- Using R Studio software in data analysis
- Analysis by Naive Bayes Classifier method

Population Influence on Positive, Recovery and Death Covid-19 in Malaysia**Jul 2020**

- Using Geoda software in data analysis
 - As coursework Sistem Informasi Geografi (SIG)
-

SKILLS**Hard Skill**

Statistical tools (Python, SQL/No-SQL, Google Sheet, Metabase, Apache Superset, Loker Studio)

Soft Skill

Communication | Analytical Thinking | Critical Thinking | Problem-Solving | Leadership | Teamwork | Handling Pressure
